- Proficient in React, Node.js, Express, and Firebase for full-stack web apps.
- Skilled in Figma, Affinity, and Adobe Express.
- Experienced with Git/GitHub for version control and collaboration.
- Experimenting with various ui/ux frameworks.

LANGUAGE

English

About Me

Aspiring full-stack developer and 3rd-semester IT engineering student with hands-on experience building web applications using React, Node.js, Express, and Firebase. Strong foundation in data structures, algorithms, and computer organization, with practical exposure to Git/GitHub, API integration, and database design. Actively contributing to open-source projects and developing a sustainability-focused carbon footprint tracking app, with a keen interest in generative AI, AI agents, and scalable web architectures.

WORK EXPERIENCE

Ongoing (2025 - Present)

Full-Stack Developer

Equil - Carbon Footprint Tracking App

- Developed sustainability web app using React, Node.js, and Firebase for real-time carbon tracking.
- Integrated emission APIs and interactive charts for travel, energy, and diet insights.

Jul 2025 - Present

Open-Source Contributor & Participant

Hacktoberfest & Open Odyssey Contributions

- Contributed to Hacktoberfest challenges across assist-ai (AI resume builder) and mini-js-games-hub.
- Submitted GitHub PRs for AI features, JS game integrations, and bug fixes.

April 2025

Using MIT App Inventor

ResQnow App

- Sending emergency SMS with location and quick access to emergency contacts, geo-tracking functionalities.
